Notice Board

1. Lack of proper Navbar :

- The navbar only has a search field and an option to change the color and font size.
- The search field doesn't work.
- The inclusion of a color option in the navigation bar is unnecessary and adds unnecessary complexity to the user interface, hindering usability.
- Similarly, the font size option in the navigation bar is also unnecessary, as users can easily utilize their browser's zoom functionality to adjust text size according to their preferences.

[Photo Gallery](#)

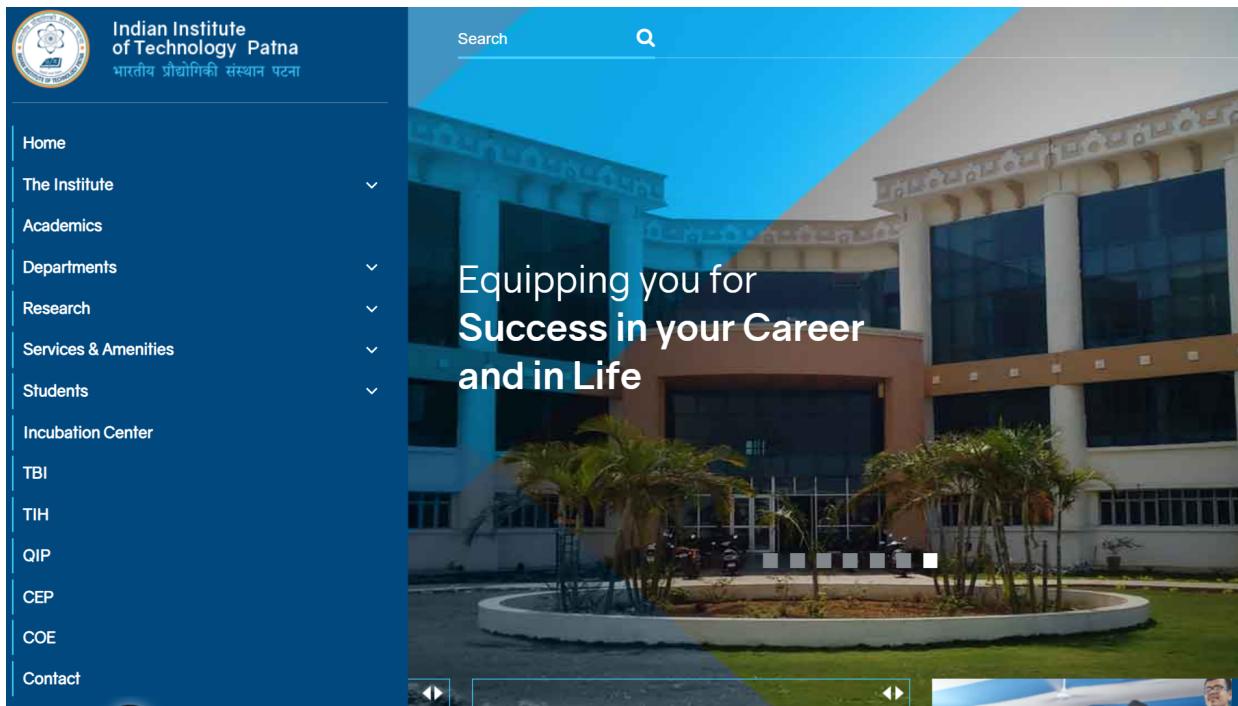

- e. By setting the font size to its highest value and altering the color to yellow, the page exhibits an inconsistent color scheme that may be off-putting for the user.

Improvements that can be made :

- Expanding the navigation bar to include essential navigation options, allowing users to easily access different sections or pages of the website.
- Implementing a functional search feature that provides accurate results and assists users in finding relevant content efficiently.
- Minimalist design for the navigation bar, emphasizing simplicity and ease of use.
- **Consistent and responsive design across different devices, optimizing the website for mobile and desktop users alike.**
- Excluding the color and font size choices from the navigation bar.
- Include the college logo at the left side of the navbar.

2. Unnecessary Sidebar :

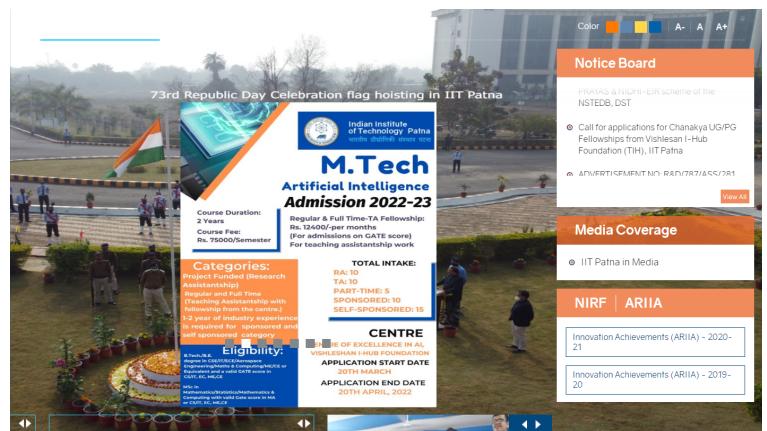

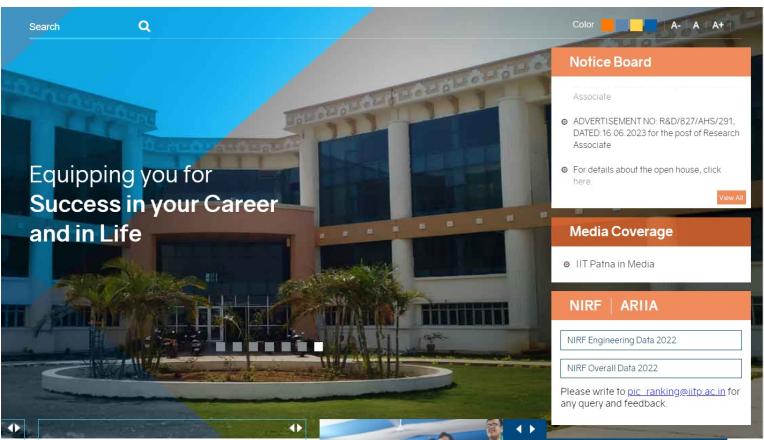

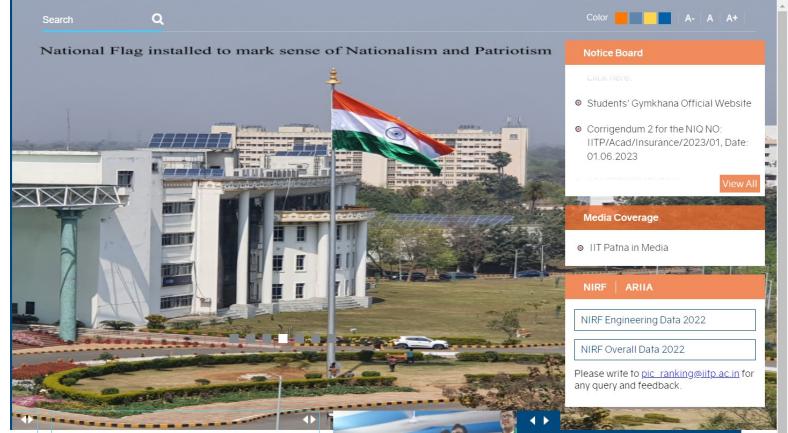

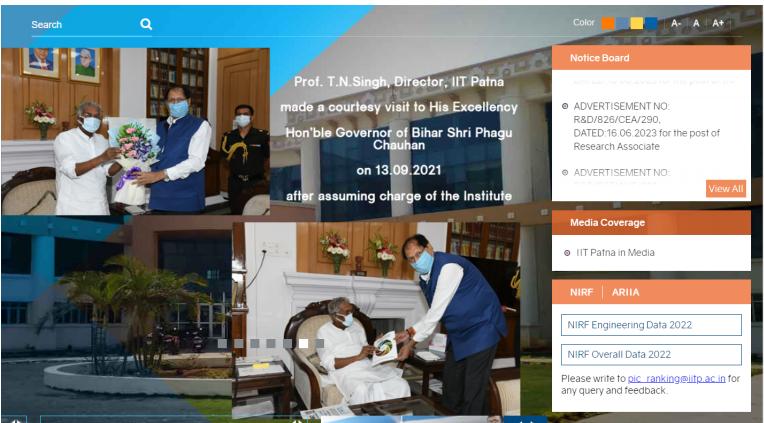

The inclusion of a sidebar in this website seems unnecessary, as it contains all the essential information that could have been placed in the main navigation bar.

Improvements that can be made :

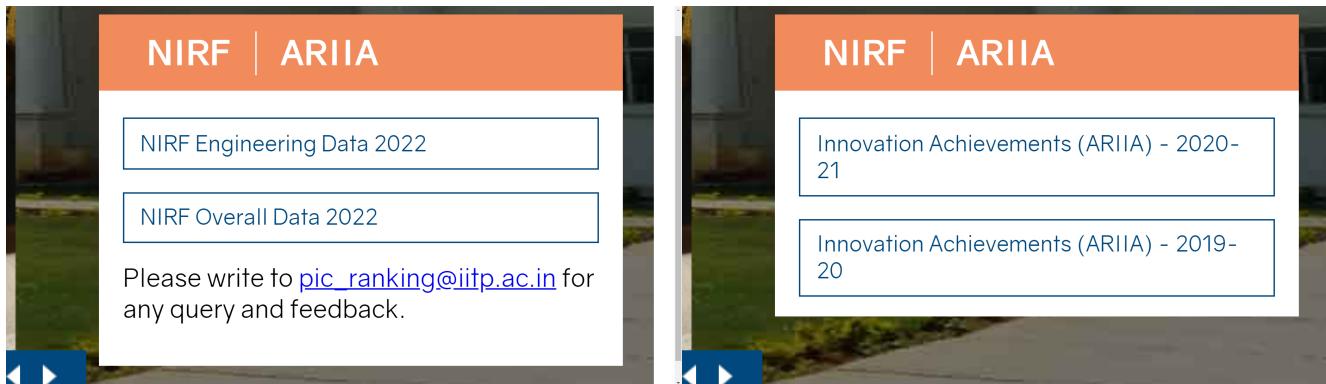

1. Consider eliminating the sidebar since this website has limited information that can be easily accommodated within a simplified main navigation bar. This approach will declutter the interface and provide a more focused user experience.
2. If the college insists on retaining the sidebar, it would be beneficial to implement a hamburger button. This functionality allows users to toggle the visibility of the sidebar, freeing up valuable screen real estate for other important content. This approach ensures that users have control over the sidebar's presence, enhancing the overall usability of the website.

3. Image slideshow in the webpage :

1. A few slides have texts present on them which could have been a caption under the particular slide.
2. The slideshow must be in a way that they don't overlap with the other unrelated elements of the webpage.
3. Slideshow does not have images of good quality.
4. Posters overlap the slideshow hiding the images behind. Such posters could have been displayed separately.
5. The three cards present along the slideshow must be present below it to make sure that they don't interfere with the slide show.
6. After rapidly navigating through the slides several times using the provided buttons, the web page becomes unresponsive.

4. Notice board, media coverage, NIRF|AIIRA :

1. The three cards present could have been stacked horizontally below the slideshow to ensure they don't interfere with the slideshow elements.
2. The colors do not match the overall color of the webpage. The color used provides no significance.
3. Media coverage description has an unnecessary bulletin.
4. View all buttons could be bigger for the Notice board.
5. NIRF and AIIRA were two separate buttons producing separate results. They could've been separate cards as users wouldn't have noticed that they were 2 separate buttons.

5. The three cards :

1. There is no uniformity among the cards. First 2 were of one design and the other one is made of a completely different design.
2. The cards must be rectangular.
3. The next/previous button must be placed at the bottom right corner (Since, we perceive from left to right).
4. Buttons for next/previous could be made bigger in size and could be rectangular for better UI.
5. 1st card : All the content must fit into a card unlike the one in the first card.
6. All the font-style must be the same. The 'message' text is yellow and stacked in-between its preceding and succeeding text in the first card.
7. 3rd card : The photo gallery button should be of a lighter blue color, present in the bottom right and displaying the image there along with the news was creating a point of confusion.
8. The photo gallery could have used a separate card section, not interrupting the other topic.

AIIMS New Delhi : 67...
From a recogni... 2nd Institute Day 2022
All India Institute Of Medical Sciences New Delhi

^

1. Navbar :

The screenshot shows the AIIMS New Delhi homepage. At the top left is the AIIMS logo with the text "AIIMS New Delhi". To its right is the name "अखिल भारतीय आयुर्विज्ञान संस्थान, नई दिल्ली" and "All India Institute Of Medical Sciences, New Delhi". The top right features links for "OPD Appointment", "Emergency Dashboard", and "ORBO Donor Pledge Form". Below the main title is a search bar with the placeholder "Search...". The navigation bar at the bottom includes links for Home, About Us, Departments & Centers, Tenders, Appointments, Research, Library, Events, Notices, Resident's Corner, Academic Section, NIRF, and Attendance Dashboard.

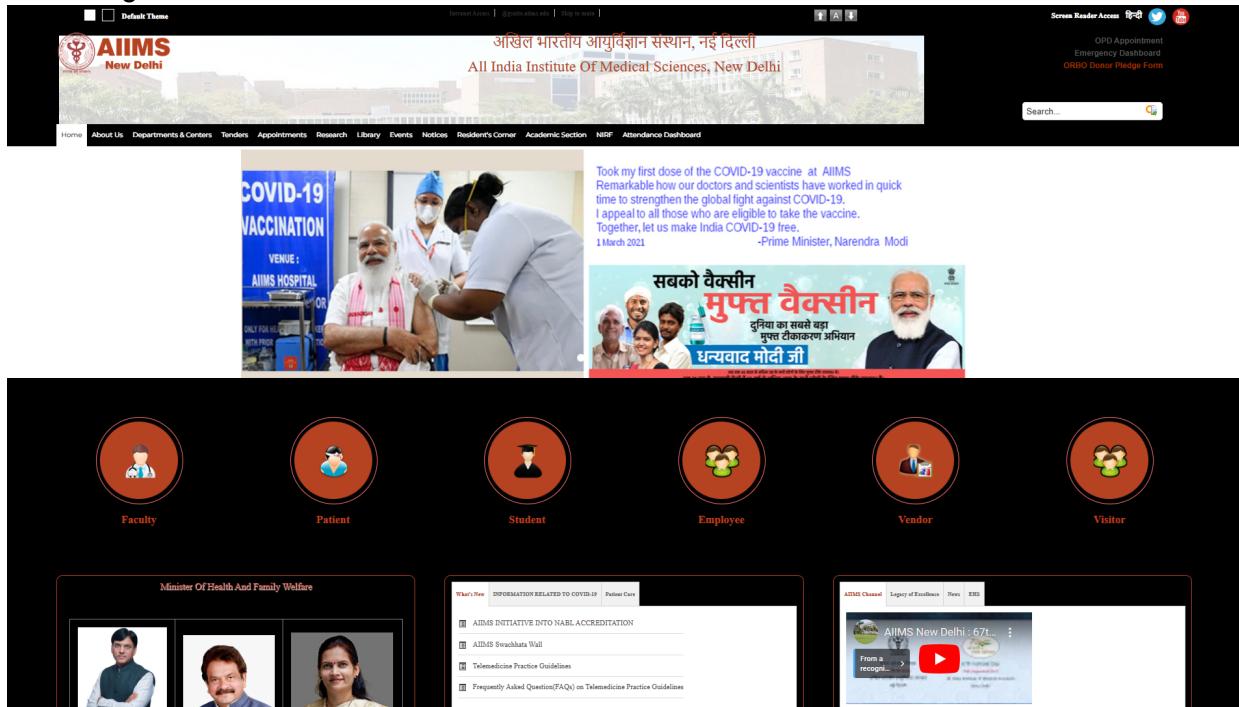

1. The font-style used in the Navbar were Montserrat and the font-style used in the dropdown is Open sans. It is important that we maintain uniformity among the entire navbar. Using a different font-family was not required here.
2. The search tool does not provide a clear image of the button.
3. The font size could have been made bigger for the buttons in the navbar. The search bar could be alongside the other buttons.
4. Over the navbar, There are several buttons that are arranged in an uncomfortable manner. The user would face difficulty in viewing those. Therefore, using a sidebar for all such buttons would be a better option.

The screenshot shows a sidebar menu on the right side of the page. The menu items are: Home, About Us, Departments & Centers, Tenders, Appointments, Research, Patient Care, Director, Management, Annual Reports, Minutes of Meeting, AIIMS Online Donation, and AIIMS Documentary. The "Teaching" menu item is highlighted with a red background.

- The top and bottom arrow button increases and decreases the font size which again, is not required.

2. Dark Theme :

Incorporating a dark theme for any website is a good idea provided that it is not too dark and too light at the same time.

The dark theme functionality here does not cover all the portions of the webpage.

3. Slideshow :

1. The brown and white background color in the slideshow is unnecessary.
2. The slideshow could have been made better with a fixed rectangular frame that does not span the entire width of the page.
3. In that way, there won't be a need for background color.

4. Cards :

The image shows three cards from a website:

- Minister Of Health And Family Welfare:** A card featuring three portraits of ministers. Below each portrait is a name and title. The names are Dr. Mansukh Mandaviya, Prof. S. P. Singh Baghel, and Dr. Bharati Pravin Pawar.
- Director AIIMS:** A card featuring a portrait of Dr. M Srinivas with the text "Director AIIMS" above it and "Dr. M Srinivas" below it.
- COVID-19 Information Card:** A card titled "INFORMATION RELATED TO COVID-19" with a "Patient Care" tab selected. It lists several links:
 - Telemedicine Practice Guidelines
 - Frequently Asked Questions(FAQs) on Telemedicine Practice Guidelines
 - NABL Certification Microbiology
 - Mobil App for AIIMS Antibiotic Policy

Gallery

1. The cards are not the same height.
2. The first card could have made all the four names aligned in the same line. With the director's heading 'Director AIIMS' below his image followed by his name.
3. The font style used in these cards are not preferable in a college website. It has to be more professional, therefore, they could've even opted for a basic font-style such as Arial.
4. Removing the buttons present in the second and third card and adding them as separate components.
5. The first card could occupy the entire horizontal space followed by the second breaking the components into three parts and occupying the entire horizontal space followed by the third doing the same as the second.

The image shows three cards from a website:

- Minister Of Health And Family Welfare:** A card featuring three portraits of ministers. Below each portrait is a name and title. The names are Dr. Mansukh Mandaviya, Prof. S. P. Singh Baghel, and Dr. Bharati Pravin Pawar.
- Director AIIMS:** A card featuring a portrait of Dr. M Srinivas with the text "Director AIIMS" above it and "Dr. M Srinivas" below it.
- COVID-19 Information Card:** A card titled "INFORMATION RELATED TO COVID-19" with a "Patient Care" tab selected. It lists several links:
 - Covid-19 in Children - Case based Interactive Session by AIIMS, New Delhi
 - National Grand Rounds on COVID-19 on 27th January 2021(21/01/2021)

6. There must have been a scroll feature implemented here since it goes on to occupy a huge vertical space. Also, it would have been better than the scroll feature to include these data in a new page using a read more button at the bottom right.

5. Icons and overall design :

The screenshot shows the homepage of the All India Institute of Medical Sciences (AIIMS) website. The top navigation bar includes links for Intranet Access, @gsuite.aiims.edu, Skip to main, Screen Reader Access (in Hindi), and social media links for Twitter and YouTube. The main content area features the AIIMS logo and name in both English and Hindi. A search bar and a banner for OPD appointment and emergency services are also present. Below the banner is a large circular graphic containing icons for different user roles: Faculty, Patient, Student, Employee, Vendor, and Visitor.

1. The icons could have been implemented in a better fashion. Since there are only a few that occupy a huge space, it signifies that these sections are one of the most useful features implemented for the users.
2. Could have implemented a better set of icons for it.
3. Overall the design is based on a maroonish brown and white background. It signifies force, depth and passion. They should have opted for a lighter color that is more orange that signifies : optimism, confidence, enthusiasm, warmth, and agreeableness. Even bigger hospitals like the Orlando Regional Medical Center prefer using a lighter orange for a soothing experience.

6. Lack of icon for the web page :

Could have used their logo in inspite of having no logo at all.
